

CANBUS-ENABLED, SEALED OPERATOR CONTROL MODULE FOR HEAVY DUTY EQUIPMENT

The CAN Rocker is a CANbus technology-enabled, programmable operator control module. The watertight module is ideal for panels and armrests in off-road/heavy equipment and vehicles.

The CAN Rocker has three switches, each of which features two RGB LEDs to denote functions, such as cab temperature and vehicle speed. Use CAN messages to select nearly any LED color or brightness and to program buttons for two- or three-position, momentary or maintained action. Customers can snap in alternative buttons and reprogram switches in the field.

Features:

- Snap-in design for easy installation and button changes
- Programmable LEDs with variable intensity color and synchronized or individual flashing
- Standard and customizable icons
- Customer-configurable operating parameters
- Choose two- or three-switch position and momentary or maintained function for each rocker position
- Supports up to seven modules using a secondary CAN expansion bus connection
- Built-in Deutsch® connection
- 9-32VDC voltage input
- Sealed to IP65
- Withstands -40°C to +85°C operating temperatures
- Buttons available in black, red, yellow or orange

Standard Characteristics/Ratings:

ELECTRICAL RATINGS:

Supply Voltage: 9-32 VDC

Electrical Life: 1,000,000 cycles

MECHANICAL:

Mechanical Life: 1,000,000 cycles

Enclosure Design: ISO 20653, IP65-Dusttight, Water Jets (Electronics Only)

Temperature Range: -40°C to +85°C

PHYSICAL:

Base Material: Black Thermoplastic

Button Material: Black Painted Thermoplastic, Laser Etched Graphics

Illumination: Programmable RGB LED for each individual graphic

Bezel Material: Black Thermoplastic

Connector: Compatible with DT06-6S

ROCKER CONFIGURATION OPTION SHOWN

CANBUS-ENABLED, SEALED OPERATOR CONTROL MODULE FOR HEAVY DUTY EQUIPMENT

The standard CAN Rocker ships with a default configuration with pre-specified communications parameters unless indicated otherwise. These are the summarized CANopen parameters for the default configuration spelled out in the User Manual (OTTO P/N: 804487-1):

Node ID = 127

Baud rate = 250Kb

Rocker module Receive PDO for LEDs

- COB-ID = 0x27F
- Data: See 7.2 LED WRITE 4 BYTE DATA J1939 AND CANOPEN

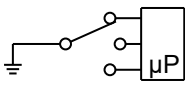

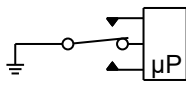

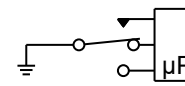

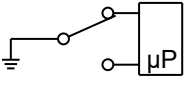

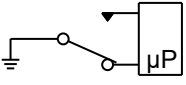

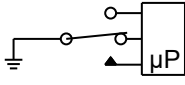

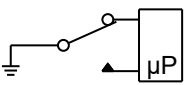

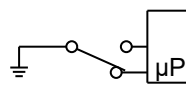

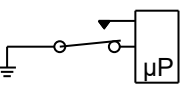

Rocker module Transmit PDO switch contact data:

- COB-ID = 0x1FF (change event only)
- Data: See 7.1 SWITCH CONTACT READ 2-BIT DATA
 - Byte 1: Base module STATUS0
 - Byte 2: Base module STATUS1
 - Byte 3: Base module STATUS2

Expansion modules are disabled

- Error messages will be transmitted if expansion modules are enabled but are not connected.

Custom order: The CAN Rocker module may be ordered pre-configured to customer parameters to drop into a customer CAN network. In these cases, OTTO will establish a customer-specific part number tailored for every instance of a CAN Keypad module used. Consult with an OTTO salesperson for more information. Refer to User Manual (OTTO P/N: 804487-1).
